Work experience

- Data Scientist at Fasten Inc. (2017-present)
  Main activity: research of drivers' behavior, static pricing
- Data Scientist at Antiplagiat (2016-2017)
  Projects: fraud detection, matching of bibliographic references, classification of scientific documents, analytics and report automation, software engineering for data import
- Data Analyst at Forecsys (2016)
  Main activity: development of image recognition competition
- Private tutor in Math (2013-2015)
  Main activity: preparation for exams for students of schools and universities. Achievement: raised the mark of State Final Certification from satisfactory to excellent

Skills

Machine Learning: python, numpy, scipy, scikit-learn, XGBoost, Vowpal Wabbit, NLP tools (gensim, nltk);
Deep Learning: Tensorflow, Keras;
Data Analysis and Web Scraping: SQL, pandas, Apache Superset, Selenium, SQLalchemy, urllib;
bash, cron, git, docker

Education

- Higher School of Economics, Moscow (MS in Data Science, 2015-2017)
- Irkutsk State University (Bachelor's in Applied Mathematics and Informatics, 2011-2015)

Side Projects

Translation of Open Machine Learning Course to English at [Medium](#) ([Github](#) repo), contributing to Russian version of the course at Habrahabr ([first article](#) of the series), editing articles

Languages

English - upper-intermediate
German, Spanish - elementary, willing to improve fast if needed in work

Interests

Gym, rationality, self-education, foreign languages improvement, humanities
